# Discover Penwith - Desktop Wireframes

The Discover Page Wireframe

The Discover Page is the homepage of the website. It will start with a navigation and featured image/text overlay and CTA button- which will feature on each page of the site using a different background image and different CTA button.
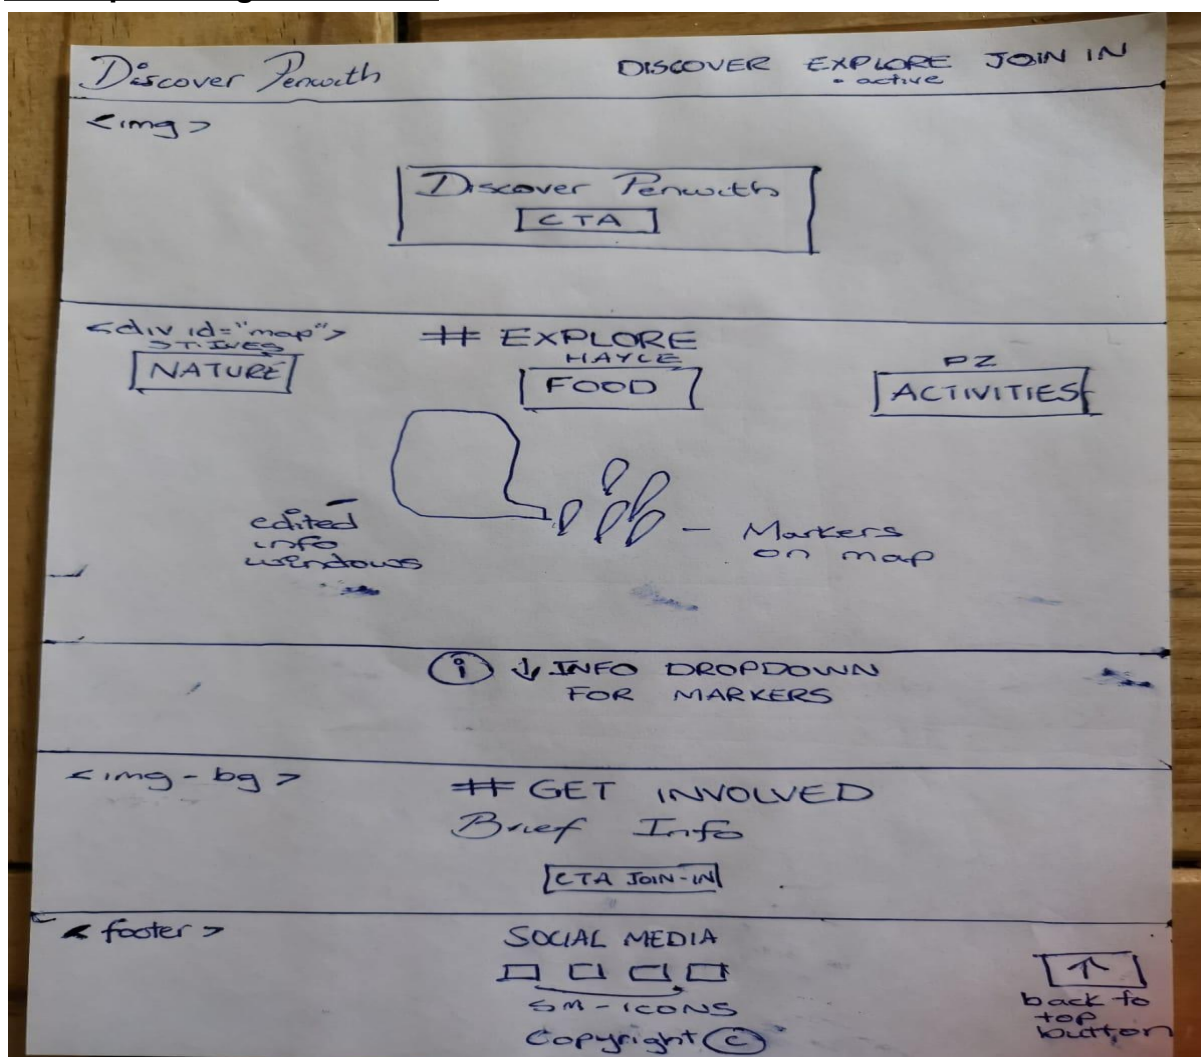

The # DISCOVER section will offer information on the towns of St. Ives, Hayle and Penzance in Penwith, Cornwall. Upon clicking the buttons, the information for the relevant town will appear and the other town cards will disappear . Each town section will have a floating close button to navigate back to the standard homepage.

The Top 5 Experiences will list 5 favourite destinations to visit whilst staying in Cornwall, with a brief summary and links available to relevant websites with more information about tickets and/or navigation.

The footer will be the same across all 3 pages, it will be a basic format offering the main Social Media links and copyright information.

There will also be a fixed floating 'back to the top' button on every page, using HTML and CSS.
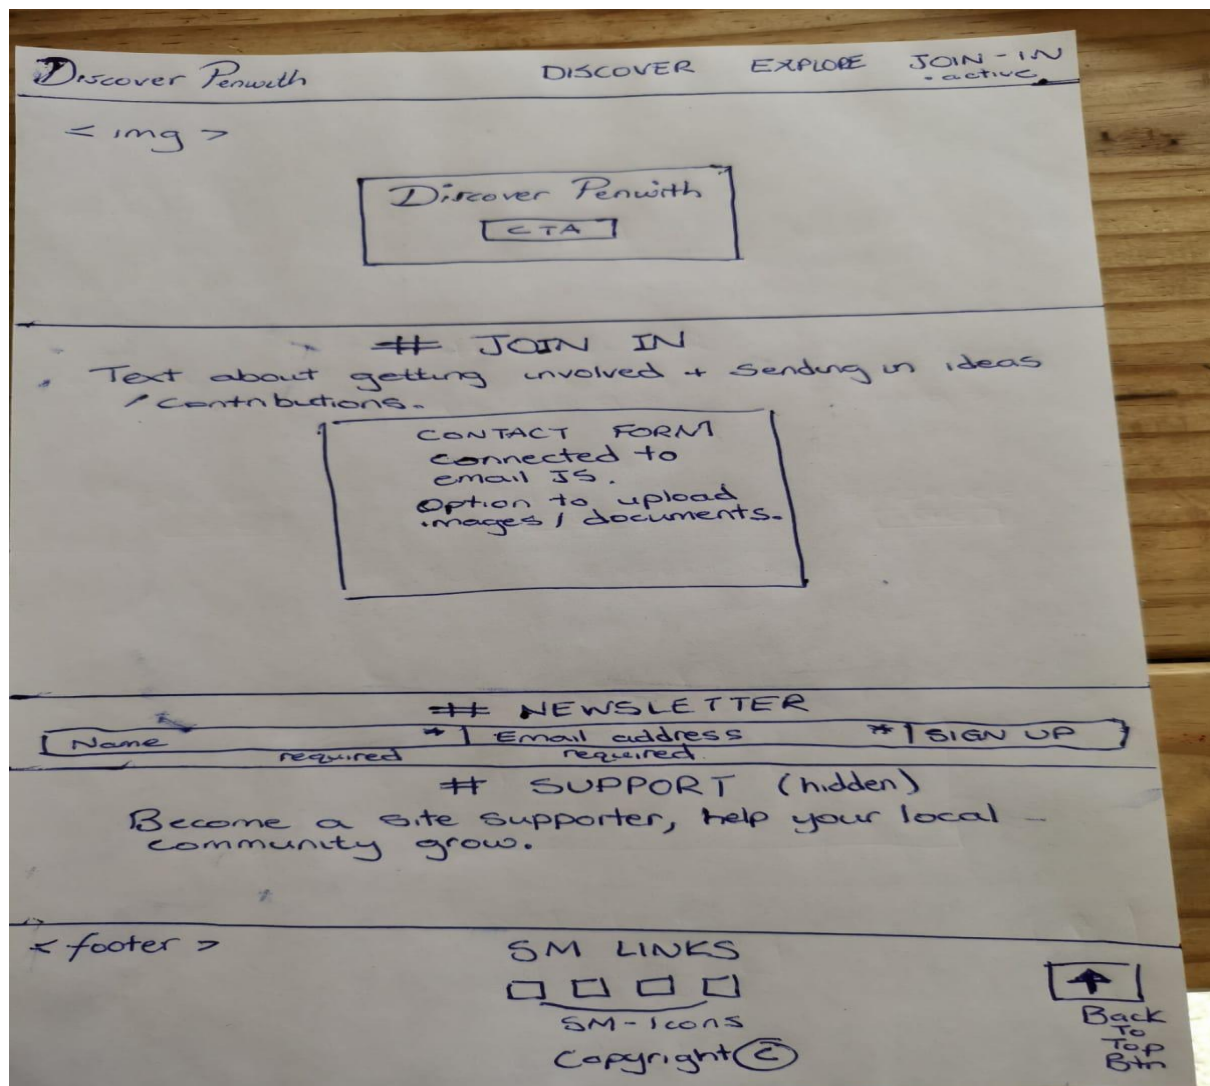

The Explore Page Wireframe

The Explore page will feature the same feature image set-up and text overlay/CTA button, prompting users to visit the # DISCOVER page.

The # EXPLORE section will be built around a map, the map will be built around the 3 town sections 'St Ives, Hayle and Penzance', each town will have 3 categories to choose from 'Nature, Food and Activities'. Upon clicking one of the categories the map will generate places to explore based on the category chosen. Each marker will produce an edited Info Marker and when each section is clicked- a dropdown summary relevant to the clicked category and town will display below the map.

The # GET INVOLVED section will list information on how users can get involved with the website and help enlarge the content. There will be a CTA that takes users to the join in page where they can fill in the form and get involved with the development of the site by making suggestions of things or places to add.

The footer will be exactly the same as the homepage, along with the back to the top button.

The Join-In Page

The Join in page will again feature a feature image with a text overlay and CTA button.

This page will be all about getting the community involved, the # JOIN IN section will be built around an EmailJS form. Users will be able to submit ideas and suggestions on how to enhance the website and add to the content in the future.

Users will also be able to sign up for a future newsletter using the # NEWSLETTER section. There will also be a hidden section to be published in the future where users will be able to become site supporters and support the upkeep of the website.

The footer section will be the same as the other pages.
